

## An Innovative High School Prep Program

With a newly designed curriculum, students will be exposed to high school level science and math. In addition to lab experiments, students will take a field trip to Lake Erie and explore the properties of water within their own neighborhood.

### Benefits of the Program

- No cost to families!
- Exposure to high school level science and math.
- Further reinforcement of 8th grade science and math.
- Opportunity to use state-of-the-art lab equipment, technology, and resources.
- Increased student confidence in the fields of math and science.
- Learn about the practical application of math and data.

## The Early High School Program

ST. FRANCIS

believers. achievers. peacemakers.

**SAINT MARTIN  
DE PORRES High School**

*A Cristo Rey Network School*

*Transforming urban Cleveland one student at a time*

## The Early High School Program

Through this program, 8<sup>th</sup> grade students at Saint Francis Elementary School will attend Saint Martin de Porres High School for approximately two hours every Tuesday.

Following a new and innovative curriculum, they will study the unique qualities of water and energy, connecting it to their everyday lives.

Additionally, students will use the resources of a high school science lab and a wireless environment to learn about the practical application of math and data to their studies.

## Meet the Teacher

Brittany Kirby

Mrs. Kirby is in her third year as the Chemistry Teacher at Saint Martin de Porres High School. She also has experience teaching in New York City through the Teach for America program where she taught in both English and Spanish.

Mrs. Kirby also coaches cross-country and has taught in our Summer Scholars Program. Mrs. Kirby is excited to use her knowledge and unique teaching abilities to help students at Saint Francis develop a love and curiosity about science.
